

## IT 330

### Final Project

Spring 2016

Proposal Due: 5/17/2016 by 11:59pm

Due 6/10/2016 by 11:59pm

Point Totals: 100 Points

### Summary

Create a WPF or Web Forms application that persists information to the database.

### Criteria:

1. Can be a simple business application, interactive kiosk or game
2. Must persist data to a database and use the data in some fashion
3. You may partner with one other student. Both members of the team must submit all deliverables individually. No other collaboration allowed.

### Deliverable

**Proposal:** The proposal must be a one-page document explaining what your application does and what data it will store. You must specify who you are working with. You must submit this file to D2L.

**Final Project:** Submit a zip file on D2L using this naming convention: Final-Smithz.zip, where Smith is your last name. The zip file should include all the complete Visual Studio project.

### Grading Breakdown

- Functionality: 25%
- Context / Model Design: 20%
- Creativity: 20%,
- Proposal: 5%
- Comments: 10%
- Indentation: 10%,
- Submitted Correctly: 10%
