

# **IT 330**

## **Assignment 5**

Spring 2016

Due 5/22/2016 by 11:59pm

Point Totals: 100 Points

### **Summary**

Create an ASP.Net form for an online application that stores the application information in a database. You must create a page to show the contents of the table. Examples: loan application, application to buy a house, application to an organization. Be creative!

### **Web Forms App Detailed Specs:**

Create the following pages:

1. An .aspx page named application-form.aspx that accepts an online application to an organization. Use your imagination to create an interesting organization and application form. Include a validator control for each textbox on the form. Include at least one RegularExpressionValidator control. The information must be stored in a database table. Your page should contain at least six fields. **Two fields have to be a control other than a textbox (Checkbox, RadioButton etc.)**
2. An .aspx page named view-applications.aspx that allows the user to view registrations.
3. Use an external style sheet to style your pages

### **Deliverable**

Submit a zip file on D2L using this naming convention: Proj5-Smithz.zip, where Smith is your last name. The zip file should include:

### **Grading Breakdown**

- Applications that don't compile get a 0!
- Functionality: 20%
- Context / Model Design: 20%
- Creativity: 20%,
- Well Written: 10%
- Comments: 10%
- Indentation: 10%,
- Submitted Correctly: 5%
- Style Sheet : 5%
